Retail, Entertainment & Publishing: Walt Disney; Bass Taverns; Signet Trading; Trader Media; Express Gifts; DRL Limited

Legal: Eversheds; Burgess Salmon; Lexis Nexis

Student Comments

"Superb and comprehensive content. The instructor was friendly, helpful and knowledgeable." - Sarah Entwistle, Business Analyst, DRL Limited

"Excellent practical demonstration on how to apply UML to real world development, delivered by an instructor totally conversant with the subject." - Michael Marsh, Software Engineer, allpay.net Limited

"Attention to detail of all techniques being taught and the progression of the case study put into context the benefit of using this approach." - Simon Burchell, Business Analyst, Trader Media Ltd.

"[The instructor] has an excellent understanding of the subject and his knowledge across all disciplines was very considerable. A very good course in understanding how business analysis feeds into systems analysis and into design and development. Fills in the gaps that other so called BA courses don't." - Gavin Bowler, Independent Consultant

"The instructor managed to adapt his delivery on-the-fly to cater for our competencies and to suit both our circumstances and backgrounds. He very quickly realised that the students could handle an accelerated programme, and adjusted his delivery accordingly." - Bernard Smalley, small-e limited

"[The instructor was] very knowledgeable. It was good to learn not just the right way to do things but the most effective way. Was good to use a tool during the course so that I now have some idea about the features that are essential for a tool to be useful." - Ed Webb, QMUL

"Found the course and materials very useful. Well balanced between theory and practical sessions." - Simon Cooper, Developer, NFU Mutual
